SEAN VENZ QUIJANO

Junior Developer | Talisay City, Philippines | +63 915-019-3697 | quijano.seanvenz@gmail.com

EDUCATION

Cebu Institute of Technology - University **Cebu City**

Bachelor of Science in Computer Science *Graduation Date: Jun 2024*

WORK EXPERIENCE

Delonix Marketing Corporation **Cebu City**

Web Development Intern *Jun 2023 - Aug 2023*

- Collaborated with designer to ensure adherence to PSD format for new web pages, resulting in a seamless user experience and improved customer satisfaction.
- Implemented SEO best practices by optimizing meta tags, images and improving website performance, leading to an increase in organic search traffic.
- Revamped existing WordPress design templates from colleagues to align with client branding guidelines.

CodeChum **Cebu City**

Freelance Content Development *Jun 2023 - Aug 2023*

- Researched and developed comprehensive web development topics on HTML, CSS, and Javascript for students.
- Created quizzes to accompany web development tutorials, enhancing user learning experience.

Odysse

Junior Developer *Oct 2024 - Present*

- Developed and deployed custom, hard-coded WordPress themes for clients ensuring pixel-perfect responsiveness, SEO best practices, and sub-3-second page load times on both desktop and mobile.
- Implemented a Backend-as-a-Service (BaaS) solution using the using MySQL, Express, React.js, and Node.js stack, contributing to RESTful API development, integration of secure authentication, and database performance optimizations.
- Produced and published video tutorials demonstrating how to use various company-developed products, streamlining user onboarding and reducing support inquiries.
- Designed and develop a variety of company products—including custom WordPress plugins and web applications—collaborating with cross-functional teams to deliver scalable, user-centric solutions.

PROJECT EXPERIENCE

Manito-Manita **Talisay City**

Automated Secret Santa Web Application

- Architected and built a fully automated Secret Santa web application with React.js and Firebase, eliminating manual draw processes.
- Enabled dynamic group creation: admins enter participant count to generate unique invitation links.
- Implemented real-time nickname ("manito") assignment and secure image-enabled wishlist uploads, ensuring assignment confidentiality until reveal.
- Facilitated community engagement by allowing all members to browse peer wishlists in read-only mode, improving transparency and reducing support questions.

Wallet Wise **Cebu City**

Lunch budgeting application

- Engineered an extensive backend solution for food selections, encompassing both on-campus and off-campus choices from diverse stores, powered by C# and Firebase.
- Developed a delivery and messaging feature for students to deliver food to their peers.

Thesis **Cebu City**

Transcribing Bisaya Spoken Words into English

- Fine-tuned a BERT-based model to accurately transcribe spoken Bisaya into English, significantly enhancing cross-language transcription quality.

CERTIFICATION

Udemy **Talisay City**

Javascript *Graduation Date: Apr 2023*

Backend Development *Graduation Date: Dec 2023*
